Poster List

- Mohammed-Amin AMINIAN (IPGP, Paris, France) : *"Tilt correction and compliance removal from broadband ocean bottom data"*

- Emmanuel CABALLERO-LEVYA (ITES, Strasbourg, France) : *"The initiation phase of the 2017 Mw6.7 Valparaiso earthquake: Assessment of seismic and aseismic contributions"*

- Lise FIRODE (OVPF-IPGP, La Réunion, France) : *"Seismicity under a dormant volcano: identification of an active crustal fault below Piton des Neiges."*

- Auriane KEROMNES (ENS Lyon, France) : *"Source amplitude study for attenuation tomography"*

- Fabrice LEPOINT (CEA, Paris, France) : *"OptoSeismo : a very broadband optical seismometer"*

- Carl MARTIN (Univ. of Cambridge, UK) : *"A global search for ULVZs with Sdiff postcursors"*

- Luc MOUTOTE (ITES, Strasbourg, France) : *"What fraction of Southern California foreshock sequences suggest a non-cascading nucleation phase ?"*

- Emilie PIROT (IPGP, Paris, France) : *"Exploring Greenland seismic signals with machine learning"*

- Federica ROCHIRA (Univ. of Muenster, Germany): *"On the importance of using array seismic methods"*

- Le TANG (LMU, Munich, Germany): *"Single-Point Dispersion Measurement of Surface Waves using Rotational motions in Weakly Anisotropic Media"*
